

# Soapy Foam Sculptures

By Anne Marie Helmenstine, Ph.D.

## Materials

- microwave-safe bowl
- slightly used bar soap with some moisture
- microwave

## Directions

Place the bar of soap in the microwave-safe dish and zap it on high for 30-60 seconds. (A lower power microwave may need a little more time) Watch as the solid mass becomes light and frothy—like soapy whipped cream! Be careful not to touch as it will be very hot!
